

Mitigating Your Risks

04

Risk / Fear

As with all investments there are risks associated with Property Investment

Many of these risks, however, can be mitigated, so you should not let these risks hold you back from achieving your goals. Write down all your fears and the risks that have been holding you back from investing in the past. As you review these fears, write down how you can mitigate each risk and eliminate each fear.

If you are struggling to come up with ideas on how to mitigate your specific risks and fears please feel free to contact us at propertyinvestor@risehigh.com.au and we would be happy to help.

How can you mitigate this risk

and/or overcome this fear?

Cross each fear out once you are comfortable that you can mitigate the fear/risk that has been holding you back. Once you have crossed out the fears/risks holding you back you are mentally ready to take action and make your dreams a reality!
